

TODCM 1.1.0.5 Release Notes

Introduction

This release was created due to a bug in the TODCM installation when supplying a user name other than “admin”.

Database Changes

None

Enhancements and New Features

* Issue 285: Many enhancements to the template engine and outcomes and skills module. This does not affect the features and templates from the open source package.

Bug Fixes:

* Issue 299: TODCM installation is broken when using a user name other than the default “admin”. This bug will prevent the installation to properly create the new user and impossible to log into the site after installation is completed.
